

Credit Card Frauds

Internet Crimes Prevention and Research | Cyber Security | Cyber Crimes Prevention and Research

Online shopping has become the most popular and easy way of buying products from suppliers around the globe. This facility requires the buyers to enter sensitive and personal financial and Credit Card details over the websites. All the electronic data exchanged or send over the internet is visible.

Credit Card Fraud is being discovered as the easiest way to make money by Cyber Crimes Prevention experts around the world and which by all means is illegal way of making money. Hackers have diverted their attention from attacking government and institutional websites to attacking websites which exchange financial and Credit Card Details with their users.

CompuBrainTM assists its clients in ensuring that the type and extent of information exchanged on an E-Commerce website is done at a secured level and that the authenticity and security protocols of the websites are checked and verified beforehand.
