

## Essentials of IT Security

IT Security | Why CompuBrain | CompuBrain | Leading KPO in India |  
CompuBrain Services | Secured Website | IT Consultant

Modern businesses employ sophisticated, modern and advanced Information Technology assets to aid their business process and activities. Security of such IT assets is as valuable as security of a nation against its enemies, foreign or domestic.

Website, Computer Networks (Physical and Virtual), Email Accounts and Local Hard Drives are critical parts of IT infrastructure. All are vulnerable to some kind of threats like being hacked, Virus and Trojan attack, Spam and malicious software and crashing of storage device. All these parameter have devastating consequences on operations of an organization and at times can cause irreparable damages.

Therefore the security of such IT assets is very essential and a must measure. CompuBrain<sup>TM</sup>'s security provisions make sure that our clients' IT assets are as secure as a fortified enclave. CompuBrain<sup>TM</sup> Certified Network, Highly Fortified Data and Email Servers, Highly Efficient and Security Enhanced Web Servers and Rock Solid Security Protocols are always deployed for the safety and uninterrupted functioning of our clients' IT Infrastructure.
