

Data Servers and Backup Systems

Data Servers and Backup Systems | Data and Network Security | Best Antivirus Software | IP Camera and Live Monitoring | Blackberry | Assembled Computer Systems

Imagine a normal working day at your office just to find all your data to be lost, infected or crashed. This means that all your records, powerpoints to be presented to the clients, contacts and official communications, memories of college days, important milestones achieved are simply lost.

This has an emotional and financial cost attached to it. Data whether on your hard drives/storage devices and electronically stored on the web is very critical and we don't know what bit of some information may come in handy at any time in the future.

CompuBrain™ helps you avoid such catastrophe by installing secured data servers. We deploy effective measures to ensure that your data wherever it is stored is secure and available for use at a time when its needed.

We at CompuBrain™ provide a reliable backup system to copy all the data that is worth saving and make a copy of the data in our vast, reliable, secure and easily accessible servers. This helps our clients retrieve their critical data in case of their data loss due to any reason. Our data repository models are efficient enough to serve the clients needs' for data storage and recovery system.

CompuBrain™ deploys different techniques to optimize the backup procedure for dealing with open files and live data sources as well as compression, encryption, and de-duplication, among others. Our dedicated servers, team and procedure will ensure that your data is secure at all times and retrievable at any time.
